

Thank you for calling 1-800-GET-TESTED®

Our mission is to provide accurate and valuable health and wellness testing information to consumers.

1-800-GET-TESTED® has been your trusted source for weight loss testing information and referrals for over 20 years.

If you've tried non-medical weight loss programs in the past and experienced disappointing results or only short-term success, medically-guided weight loss may be an excellent option for you.

Most clinical weight loss providers will require certain laboratory tests in order to develop a personalized weight management plan for you.

Your weight management provider may give you a lab order that you can take to a clinical laboratory for the testing, but some providers will give you a list of the tests you'll need and ask you to go to your primary care provider for the lab order.

In either case, if you don't have health insurance coverage for clinical laboratory services, or if you have some coverage but your deductible or copayment for those services would be too high, we have some very good news for you.

You can order the testing you need online at extremely discounted prices by entering ORDERaTEST.com into your web browser.

ORDERaTEST.com will take you to the Health Labs website where you'll not only be able to order the tests you need, you will also be able to choose from over 4,500 conveniently located laboratory patient service centers in the United States.

So if you'd like to take advantage of this exceptional opportunity to receive the highest quality clinical laboratory services at amazingly low prices with free before and after test support, simply log on to...
